

DCM Weekly : দেশী Macro

Rates, FX, the External Sector & Global Markets

Bangladesh Bank maintains its contractionary policy rate at 10.0% through H1FY27 to anchor inflation—now easing to 9.4% from an 11.7% peak—while unveiling a Tk. 60,000 crore stimulus package aimed at reviving private credit, industrial output, and generating 25 lakh jobs; even as the economy shows a fragile recovery with GDP growth targeted at 6.5%, elevated NPLs near 32%, stable reserves and remittances, sweeping banking-sector reforms, and mounting external risks from Middle East conflict-driven energy and fertilizer price shocks.
